'new horizons in the pathogenesis assessment and

December 4th, 2016 - introduction over a decade ago the editors of the book delirium in old age stated their concerns

about waning interest in delirium they remarked that in 1970 the word delirium was referenced in 25% of all medline articles mentioning patient or subject by 2000 this had fallen to 2.5% in 2013 this proportion is the same and so delirium remains'
