'**know your abg s
arterial blood gases
explained nurse**

June 6th, 2020 - an
arterial blood gas
requires the nurse to
collect a small sample
of blood generally a
full 1 ml is preferred
blood can be drawn via
an arterial stick from
the wrist groin or
above the elbow the
radial artery on the
wrist is most monly
used to obtain the
sample however the
femoral artery and

brachial artery can be used if

necessary' '**clinical blood gases e book assessment amp intervention**

clinical gate

june 5th, 2020 - how acute pco₂

increases affect the ph and values

as mentioned previously the red

normal p co₂ blood buffer bar

shown on the p co₂ ph nomogram is

used to identify the ph and values

response to a sudden increase in p_{CO_2} for example if the patient's p_{CO_2} were to suddenly increase to say 60 mm Hg the pH would immediately fall to about 7.28 and
